## **DETAILED ACTION**

### **Response to Amendment**

1. This communication is in response to the amendment filed May 3, 2005. By the amendment, claims 1-2 have been amended. Claims 15-20 have been added. Claims 1-20 are pending in the application.

### ***Claim Objections***

2. Claim 15 is objected to because of the following informalities: The preamble of the claim recites a computer-readable medium containing a program for determining the start time of a project. However, the claims fails to recite that the computer-readable medium containing a program **to be executed in a computer**, and using said computer to perform the steps of the claimed invention. Appropriate correction is required.

Claims 16-20 depend from claim 15; and therefore are similarly objected.

### **Claim Rejections - 35 USC § 112**

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3623

The preamble of claim 1 recites a method for scheduling a project. However, the body of the claim makes no mention or does not recite any scheduling step. Applicant is requested to amend the claim to recite a scheduling step.

Claims 2-8, and 10-14 are necessarily rejected as being dependent upon the rejection of claims 1 and 9.

The examiner will reassess the potential allowance of the application if the objection and the 35 USC § 112, second rejection are sufficiently overcome.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Donnelly et al (US Patent No. 6,049,776) disclose a resource management system for scheduling projects.

b. Fredell et al (US Patent No. 6,678,698) disclose a method and system for communicating project information.
